

# Garbage Can

The plastic garbage can is made of high-density HDPE raw materials by injection molding, which is acid and alkali resistant and corrosion resistant. The barrel body, barrel mouth and bottom mechanism are strengthened and designed to have strong resistance, impact and pressure resistance. Empty barrels are nested for storage, saving storage space and convenient transportation. There are 20L, 40L, 100L, 120L, 240L and other specifications to choose from, which are widely used in the garbage collection places such as sanitation, factories, restaurants, property and so on.

Acquired CE Certification, comply with the regulations of EPA 40 CFR 264.175 of EPA and SPCC as well as U.S. NPDES.

## WHO WE ARE

Shanghai Wellguard Industry Technology Co., Ltd. focuses on the research and development of plastic production technology, devoted to the field of industrial safety. It has successively introduced dozens of world-renowned injection molding production lines to provide domestic and foreign customers in automobile manufacturing, food processing, machinery manufacturing, petrochemical, logistics and warehousing, textile printing and dyeing, steel metallurgy, transportation and other industries with professional industrial plastic pallets, garbage can, leak-proof pallets, turnover crate and other injection molding, rotational molding, blister molding, blow molding products.

### Advantages of Wellguard plastic garbage can:

1. Three reinforcing ribs are designed at the handle of cover opening to make the handle more firm and prevent impact.
2. The edge of the bin is designed with mesh stiffener, which makes the garbage can be easily towed, and the shape is invariable and impact resistant.
3. Thickened wear-resistant nails and mesh design at the bottom of the barrel can effectively protect the bottom of the barrel and enhance the wear resistance.

Harmful waste: waste containing toxic chemicals.

Kitchen waste: food waste and peel produced by the kitchen;

Other garbage: all garbage except recyclable, harmful and kitchen waste;

Recyclable: garbage with high recycling value, which can enter the waste recycling channel;

Everyone is involved in environmental action for garbage classification; letting green into our daily lives and making green life reachable.
